Celebrating International Women’s Day

International Women’s Day (March 8) is a global day celebrating the social, economic, cultural, and political achievements of women. The day also marks a call to action for accelerating women’s equality.

International Women’s Day has occurred for well over a century, with the first gathering in 1911 supported by over a million people. Today, it belongs to all groups collectively everywhere. International Women’s Day is not country, group or organization specific.

Three central beliefs underpin and guide the purpose and provisions of the International Women’s Day website:

- identifying, celebrating, and increasing visibility of women’s achievements can help forge equality
- strategic collaborations based on a foundation of shared purpose, trust, and appreciation can impact positive change for women
- worldwide awareness raising via meaningful narratives, resources, and activity can help combat gender bias and discrimination to accelerate gender parity
